

Resource Council Report for April 22, 2017 Board Meeting

Energy committee is waiting for large fans for sanctuary to begin installation and replacement of lights with LEDs. The power bill was 20% less than last month. Without a day to day comparison of temperatures, it is still too soon to see what savings we get from our cost cutting measures.

Security committee should have an electric lock on front door in a week or so. It would have individual codes for each user and the means to see past users. Lock is now on Children's door in education wing.

Property committee is having a work day Saturday, April 22 from 9 to noon. Faucets in Kitchen got replaced because of leaking around old faucets.

Phil Slemons, Chair of Resource Council
